VENTUS COMPACT SUSPENDED AIR HANDLING UNITS

CASING

- » Panels filled with mineral wool, enclosed with steel sheet on both sides.
- » Casing parameters according to EN 1886: T2, TB3, L1, D1, F9.

MINI-PLEAT FILTERS

Air filters with extended high efficiency filtration surface.

- » Supply - EU7 (ePM2,5 65%)
- » Exhaust - EU5 (ePM10 50%)

up to **93%**
drive efficiency

EC MOTORS

- » Efficient, silent and low vibrations fan with electronically commutated motor in a IE4 class.

ENERGY RECOVERY

- » Highly efficient counterflow hex recovery with by-pass.
- » Recovery efficiency reaching 90%.

RECUPERATOR BY-PASS

- » Stepless adjustment of heat recovery capacity.
- » Passive cooling function.
- » Recuperator frost protection.

CONTROLS

- » Multifunctional controls, integrated with the unit – fully pre-configured and ready to run.

VENTUS COMPACT TOP FLOOR-MOUNTED UNITS WITH VERTICAL DUCT CONNECTION

CASING

- » Panels filled with mineral wool, enclosed with steel sheet on both sides.
- » Casing parameters according to EN 1886: T2, TB3, L1, D1, F9.
- » Fan and filter section panels fitted with hinges.

DIMENSIONS

- » Unit width 88 cm - can be transported through the opening of 90 cm without disassembling the device.

CONTROLS

- » Multifunctional controls, integrated with the unit – fully pre-configured and ready to run.

ENERGY RECOVERY

- » Highly efficient counterflow hex recovery with by-pass.
- » Recovery efficiency reaching 90%.

MINI-PLEAT OR BAG FILTERS

Air filters with extended high efficiency filtration surface.

- » Supply - EU7
- » Exhaust - EU5

EC MOTORS

- » Efficient, silent and low vibrations fan with electronically commutated motor in a IE4 class.

VENTUS COMPACT FLOOR MOUNTED AIR HANDLING UNITS

CASING

- » Panels filled with mineral wool, enclosed with steel sheet on both sides.
- » Casing parameters according to EN 1886: T2, TB3, L1, D1, F9.

MINI-PLEAT FILTERS

Air filters with extended high efficiency filtration surface.

- » Supply - EU7 (ePM2,5 65%)
- » Exhaust - EU5 (ePM10 50%)

up to **93%**
drive efficiency

ENERGY RECOVERY

- » Highly efficient heat wheel driven by EC motor.
- » Recovery efficiency reaching 86%.

CONTROLS

- » Multifunctional controls, integrated with the unit – fully pre-configured and ready to run.

EC MOTORS

- » Efficient, silent and low vibrations fan with electronically commutated motor in a IE4 class.

ENERGY RECOVERY

- » Highly efficient counterflow hex recovery with by-pass
- » Recovery efficiency reaching 90%

VENTUS COMPACT FLOOR MOUNTED UNITS WITH HEAT PUMP

FOR USE IN ANY FACILITY

- » No external refrigeration equipment taking up space in your facility
- » No external noise sources

OPTIMUM MATCHING

- » Factory fit of heat pump and air handling unit components
- » Manufacturer's warranty on the final air handling unit and heat pump product

HIGH ENERGY EFFICIENCY

- » High efficiency sorption rotary regenerator for excellent heat and moisture recovery
- » Installation of multi-row condensers and evaporators on both sides of the regenerator ensures the most efficient operation of the heat pump

CONVENIENT TRANSPORT, QUICK INSTALLATION

- » The unit is divided into easy to transport and easy to assemble complete functional modules

EASY COMMISSIONING

- » Multifunctional factory assembled controls ready to work as soon as the unit is assembled
- » Easy commissioning without service

COHERENT CONTROL SYSTEM

- » Integrated control system for air handling unit and heat pump
- » Full monitoring and remote diagnostics of all components

HEAT PUMP FUNCTIONS

- » Supply air cooling in summer
- » Reduction of supply air heating costs during other periods of the year

VENTUS COMPACT FLOOR MOUNTED UNITS WITH HEAT PUMP

HEATING AND COOLING FUNCTION

- » Four-way valve automatically switches reverse operation modes
- » Automatic defrosting function in winter

OPTIMISATION OF COOLING PARAMETERS

- » Electronic expansion valve dynamically adjusts fluid flow to current air handling unit parameters

SMOOTH REGULATION OF HEATING AND COOLING POWER

- » Inverter compressor with DC motor smoothly adjusts cooling and heating power
- » Controller equipped with sensors fully controls cooling parameters of the heat pump system

MULTI-STAGE HEAT PUMP QUALITY CONTROL

- » Ongoing monitoring of the production process
- » Individual leakage and operational check confirmed by electronic report
- » UDT (Office of Technical Inspection) certificate

SMOOTH REGULATION OF HEAT RECOVERY POWER

- » Electronically controlled stepper motor of the rotary heat exchanger smoothly regulates heat recovery capacity
- » In winter time the automation system ensures three-stage frost protection for the rotary heat exchanger

- 10 Sight glass
- 11 Electronic expansion valve
- 12 Evaporator/Condenser
- 13 High-pressure transducer
- 14 Low-pressure transducer
- 15 Low-pressure switch
- 16 Suction temperature sensor
- 17 Discharge temperature sensor
- 18 Safety valve

VMS – VENTUS MANAGEMENT SYSTEM

VTS supplies control system with a factory-implemented application for remote monitoring and management of the operating parameters of the units in real time via a web browser on any mobile device.

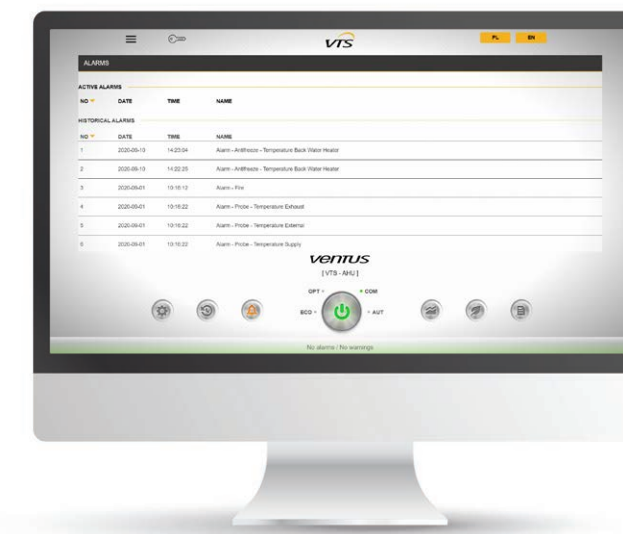

VENTUS MANAGEMENT SYSTEM:

- » Displaying visualisations on any devices - from PC to mobile devices
- » Monitoring and management of the majority of devices from the open visualisation of a single unit
- » Easy and intuitive change of the operating mode of the unit using a central button
- » Tools for supporting easy and quick setup of the optimal operating schedule of the unit

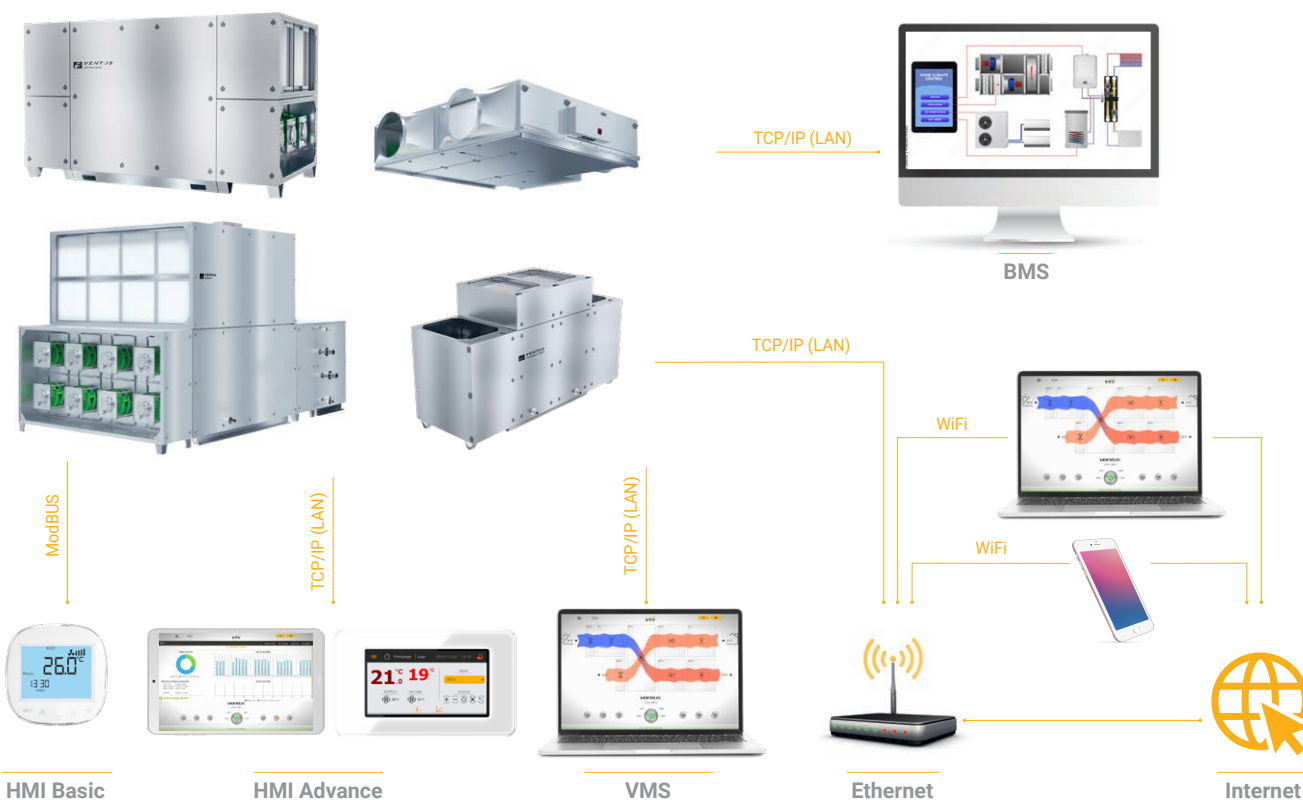

Graphical operation calendar:

- » Changing time intervals using sliders

Faults and alarms handling:

- » Clearing alarms
- » Alarm logging

Charts of unit's operation:

- » Two charts – main and secondary
- » Free selection of the set of parameters for monitoring and assigning them to selected ranges

Analysis of savings resulting from the operating scenario used:

- » Graphical representation of the use of particular energy media
- » Costs and savings shown in any currency.

CLIMACAD ONLINE 4.0 (CCOL 4)

Customized configuration

Integrated savings calculator

Intuitive selection assistant step by step

Integrated with CRM, ERP, WMA system

CCOL4 IS COMPATIBLE WITH:

» all browsers

» all operating system

» all devices

VTs BIM - INNOVATIVE APPROACH TO DIGITAL MODELS OF AIR-HANDLING UNITS

VTs has created a possibility of dynamic online generation of digital models of the units VENTUS VVS, VENTUS Compact and American VENTUS AVS. This is possible due to the launch of the new ClimaCAD OnLine 4.0 product selection program that features an .rfa [Revit®] file generator

Generated objects contain detailed parameters connectors:

- » air systems
- » hydraulic systems
- » sanitary systems
- » electric systems

as well as the complete dimensional data, including unit's maintenance and service (repair) zone.

VTs also provides digital models of WING air curtains and VOLCANO air heaters. The models contain:

- » parametrized electric and hydraulic connectors,
- » mount options vertically and horizontally,
- » presentation of the range of air stream,
- » parameter of any inclination angle of an air heater in relation to the horizontal plane.

Models can be downloaded from: <https://vtsgroup.com/vts-bim>
