### > Standard Air Handling Units

# VENTUS COMPACT SUSPENDED AIR HANDLING UNITS

### **EC MOTORS**

» Efficient, silent and low vibrations fan with electronically commutated motor in a IE4 class.

### **ENERGY RECOVERY**

- » Highly efficient counterflow hex recovery with by-pass.
- » Recovery efficiency reaching 90%.

### RECUPERATOR BY-PASS

- » Stepless adjustment of heat recovery capacity.
- » Passive cooling function.
- » Recuperator frost protection.

### CONTROLS

 Multifunctional controls, integrated with the unit – fully pre-configured and ready to run.

# VENTUS COMPACT TOP FLOOR-MOUNTED UNITS WITH VERTICAL DUCT CONNECTION

### CASING

- » Panels filled with mineral wool, enclosed with steel sheet on both sides.
- » Casing parameters according to EN 1886: T2, TB3, L1, D1, F9.
- » Fan and filter section panels fitted with hinges.

### **DIMENSIONS**

» Unit width 88 cm - can be transported through the opening of 90 cm without disassembling the device.

### CONTROLS

» Multifunctional controls, integrated with the unit - fully pre-configured and ready to run.

» Supply - EU7 » Exhaust - EU5

MINI-PLEAT OR BAG FILTERS

Air filters with extended high efficiency filtration surface.

- » Highly efficient counterflow hex recovery with by-pass.
- » Recovery efficiency reaching 90%.

### **EC MOTORS**

» Efficient, silent and low vibrations fan with electronically commutated motor in a IE4 class.

# VENTUS COMPACT FLOOR MOUNTED AIR HANDLING UNITS

### CASING

- » Casing parameters according to EN 1886: T2, TB3, L1, D1, F9.

### MINI-PLEAT FILTERS

Air filters with extended high efficiency filtration surface.

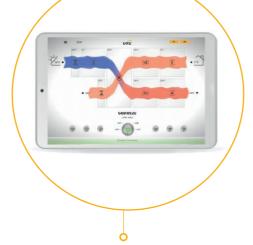

- » Supply EU7 (ePM2,5 65%)
- » Exhaust EU5 (ePM10 50%)

### **ENERGY RECOVERY**

- » Highly efficient heat wheel driven by EC motor.
- » Recovery efficiency reaching 86%.

### CONTROLS

Multifunctional controls, integrated with the unitfully pre-configured and ready to run.

### **EC MOTORS**

» Efficient, silent and low vibrations fan with electronically commutated motor in a IE4 class.

### **ENERGY RECOVERY**

- » Highly efficient counterflow hex recovery with by-pass
- » Recovery efficiency reaching 90%

## **VENTUS COMPACT** FLOOR MOUNTED UNITS WITH HEAT PUMP

### CONVENIENT TRANSPORT, QUICK INSTALLATION

» The unit is divided into easy to transport and easy to assemble complete functional modules

### EASY COMMISSIONING

- » Multifunctional factory assembled controls ready to work as soon as the unit is assembled
- » Easy commissioning without service

### FOR USE IN ANY FACILITY

- » No external refrigeration equipment taking up space in your facility
- » No external noise sources

### OPTIMUM MATCHING

- » Factory fit of heat pump and air handling unit components
- » Manufacturer's warranty on the final air handling unit and heat pump product

### COHERENT CONTROL SYSTEM

- » Integrated control system for air handling unit and heat pump
- » Full monitoring and remote diagnostics of all components

### HIGH ENERGY EFFICIENCY

» High efficiency sorption rotary regenerator for excellent heat and moisture recovery

### **HEAT PUMP FUNCTIONS**

- » Supply air cooling in summer
- » Reduction of supply air heating costs during other periods of the year

» Installation of multi-row condensers and evaporators • on both sides of the regenerator ensures the most efficient operation of the heat pump

## **VENTUS COMPACT** FLOOR MOUNTED UNITS WITH HEAT PUMP

# CERTIFIED PERFORMANCE

### SMOOTH REGULATION OF HEATING AND COOLING POWER

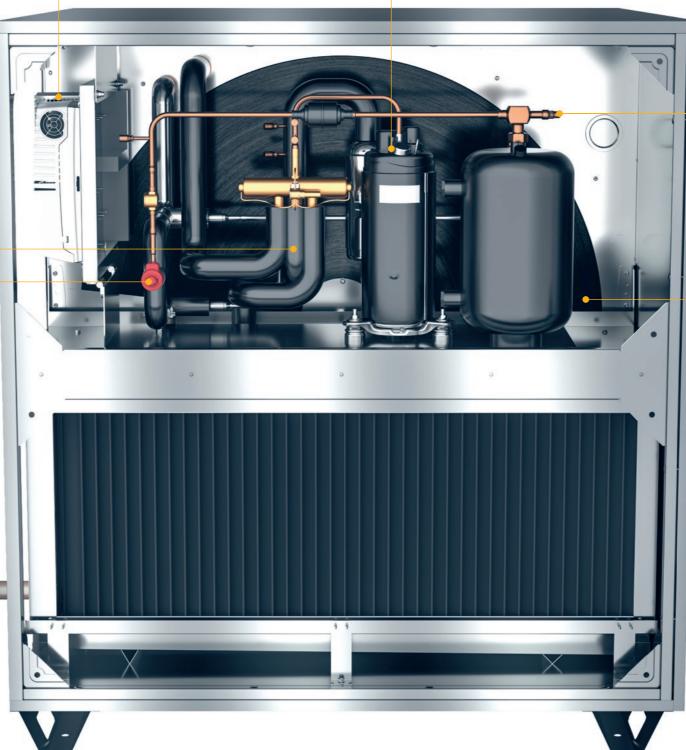

- » Inverter compressor with DC motor smoothly adjusts cooling and heating power
- » Controller equipped with sensors fully controls cooling parameters of the heat pump system

### HEATING AND COOLING FUNCTION

- » Four-way valve automatically switches reverse operation modes
- » Automatic defrosting function in winter

# OPTIMISATION OF COOLING PARAMETERS

» Electronic expansion valve dynamically adjusts fluid flow to current air handling unit parameters

### MULTI-STAGE HEAT PUMP QUALITY CONTROL

- » Ongoing monitoring of the production process
- » Individual leakage and operational check confirmed by electronic report
- » UDT (Office of Technical Inspection) certificate

### **SMOOTH REGULATION** OF HEAT RECOVERY POWER

- » Electronically controlled stepper motor of the rotary heat exchanger smoothly regulates heat recovery capacity
- » In winter time the automation system ensures three-stage frost protection for the rotary heat exchanger

## **mHMI** application

VTS Group provides an mHMI app that enables start-up, monitoring of operation and parameter control of VENTUS compact and modular air handling units. The app can be downloaded from Google Play and App Store.

mHMI application

The app connects to the unit using Bluetooth technology. All you need to do is launch the app and activate the Bluetooth module, which is located in the automatic control cabinet. The app will automatically detect the unit which you can then connect to.

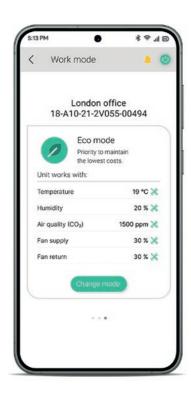

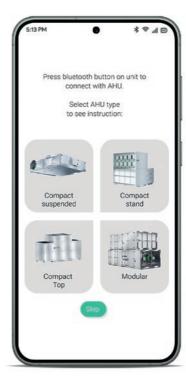

#### mHMI enables:

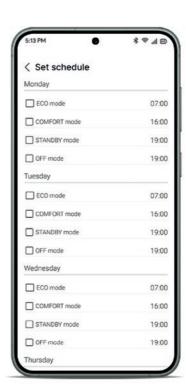

- » start up of the unit without the need for a physical HMI
- » monitoring the unit's operating parameters
- » managing the unit's operation, including changing the operating modes, changing individual parameters, setting the unit's operating schedule, or viewing and clearing alarms.

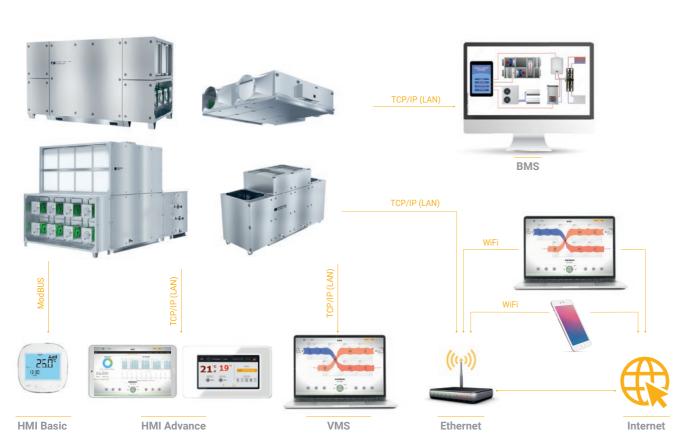

### VMS – VENTUS MANAGEMENT SYSTEM

VTS supplies control system with a factory-implemented application for remote monitoring and management of the operating parameters of the units in real time via a web browser on any mobile device.

### **VENTUS MANAGEMENT SYSTEM:**

- » Displaying visualisations on any devices from PC to mobile devices
- » Monitoring and management of the majority of devices from the open visualisation of a single unit
- » Easy and intuitive change of the operating mode of the unit using a central button
- » Tools for supporting easy and quick setup of the optimal operating schedule of the unit

Graphical operation calendar:

» Changing time intervals using sliders

Faults and alarms handling:

- » Clearing alarms
- » Alarm logging

Charts of unit's operation:

- » Two charts main and secondary
- » Free selection of the set of parameters for monitoring and assigning them to selected ranges

Analysis of savings resulting from the operating scenario used:

- » Graphical representation of the use of particular energy media
- » Costs and savings shown in any currency.

# CLIMACAD ONLINE 4.0 (CCOL 4)

### CCOL4 IS COMPATIBLE WITH:

» all browsers

» all operating system

all devices

#### DATA EXPORT TO

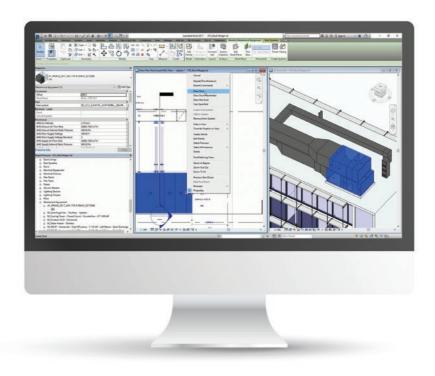

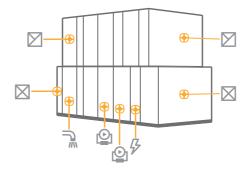

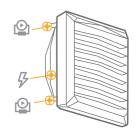

# VTS BIM - INNOVATIVE APPROACH TO DIGITAL MODELS OF AIR-HANDLING UNITS

VTS has created a possibility of dynamic online generation of digital models of the units VENTUS VVS, VENTUS Compact and American VENTUS AVS. This is possible due to the launch of the new ClimaCAD OnLine 4.0 product selection program that features an .rfa [Revit®] file generator

Generated objects contain detailed parameters connectors:

- » air systems
- » hydraulic systems
- » sanitary systems
- » electric systems

as well as the complete dimensional data, including unit's maintenance and service (repair) zone.

VTS also provides digital models of WING air curtains and VOLCANO air heaters.

The models contain:

- » parametrized electric and hydraulic connectors,
- » mount options vertically and horizontally,
- » presentation of the range of air stream,
- » parameter of any inclination angle of an air heater in relation to the horizontal plane.

Models can be downloaded from: https://vtsgroup.com/vts-bim
